The Hospital and Healthsystem Association of Pennsylvania, in partnership with more than 30 state hospital and health care associations, is excited to present a virtual summer leadership series for C-suite executives titled Leadership and Resiliency: Navigating Through and Beyond COVID-19. Join us as we bring six nationally known experts to discuss the COVID-19 pandemic crisis and share their expertise in resiliency, health policy, financial and strategic planning, unconscious bias, health equity, and the new health care ecosystem. Webinars will take place throughout the summer on Thursdays from 1 to 2 p.m. Attend all six sessions or select by individual session.

**JUNE 25**
Bite Size Coping During Times of Uncertainty
Bryan Sexton
Director, Duke Center for Healthcare Quality and Safety
Duke Associate Professor

**JULY 9**
Update on COVID-19: What’s Next and How to Plan
Marty Makary, MD
Johns Hopkins Surgeon and Professor of Health Policy

**JULY 23**
The Post-COVID Healthcare Landscape: Implications for Strategy
Jeff Goldsmith
President, Health Futures, Inc.

**AUG 6**
How Unconscious Bias Harms Patients During the COVID-19 Pandemic
Gloria Goins
Former Chief Diversity and Inclusion Officer
Bon Secours Health System

**AUG 20**
Leading a "Quiet Revolution" for Healing During a Pandemic
Dayna Bowen Matthew
Dean, George Washington University Law School

**SEPT 3**
The New Healthcare Ecosystem
Tom Koulopoulos
Chairman of Global Futures
Think Tank The Delphi Group
**REGISTRATION INFORMATION**—**CLICK HERE TO REGISTER**  
Registration is FREE to HAP members. Registration deadline for the first webinar is June 21. During the registration process, please select all sessions you wish to attend. Once registered, you will receive confirmation from HAP securing your spot. Prior to each webinar, you will receive a link to the Zoom webinar. All speakers will participate in live Q & A after each session. HAP has a significant, but limited number of connections, so register NOW and join your peers from across the country for this FIRST EVER multi-state association webinar series designed exclusively for our hospital C-suite leaders. (For those unable to attend, a recording will be available for two weeks following each presentation).

**June 25—Bite Size Coping During Times of Uncertainty**  
**Bryan Sexton | Director, Duke Center for Healthcare Quality and Safety, Associate Professor, Duke University**  
Stressed during uncertain times? If you, your staff, or your colleagues are feeling particularly spent, it is probably because the level of emotional exhaustion in health care workers was already at an all-time-high before COVID-19, with one out of three people already meeting the criteria for burnout. In this enlightening and entertaining presentation, Bryan Sexton, a safety culture, teamwork, and workforce resilience expert, will provide some perspective, hope, and simple strategies to try during tense times.

**July 9—Update on Coronavirus: What’s Next and How to Plan**  
**Marty Makary, MD | Johns Hopkins Surgeon and Professor of Health Policy**  
Dr. Makary, a leading public health expert at Johns Hopkins and Editor-in-Chief of MedPage Today, will review the latest on COVID-19 and what organizations can do to prepare for the growing epidemic. Using plain English, he will interpret the current data from overseas and U.S. studies projecting the impact in the U.S. Dr. Makary will discuss best practices of employee policies and how to adapt your business model to deal with the epidemic in real-time.

**July 23—The Post-COVID-19 Health Care Landscape: Implications for Strategy**  
**Jeff Goldsmith | President of Health Futures Inc.**  
What will the U.S. health system look like post-COVID-19? Hospitals and health systems will be facing the financial aftereffects of a COVID-related economic slowdown or recession. They will also have to deal with the political uncertainties created by the 2020 national election. Finally, they will face the continued threat of disruption of their existing businesses by new technologies and competitors. What are the most significant threats, and also opportunities, in this post-COVID-19 landscape? How do health system boards and leadership set strategic priorities for this uncertain near-term future?

**August 6—When Good Isn’t Good Enough**  
**Gloria Goins | Former Chief Diversity and Inclusion Officer for Bon Secours Mercy Health System**  
The outcomes of unconscious bias can be seen across all industries. In health care, mitigating unconscious bias is of particular importance. Evidence-based impacts of unconscious bias on safety, quality, and mortality show that we are unintentionally putting our patients at risk. Cross-cultural competency is a “must have” skill as we define what it means to address, support, and manage the ever-changing U.S. population, particularly as the world faces the effects of COVID-19. In this session, you will learn about practical actions that can be taken to reduce the effects of unconscious bias in health care operations.

**August 20—Leading a "Quiet Revolution" for Healing During a Pandemic**  
**Dayna Bowen Matthew | Dean of George Washington University Law School**  
In her presentation, Professor Matthew will identify the historic and contemporary role that health providers can play in increasing health equity. In addition, she will define the need for health care equity during the COVID-19 pandemic, and the threats to health equity that have been heightened as a result of this challenging period.

**September 3—The New Health Care Ecosystem**  
**Tom Koulopoulos | Chairman of Global Futures Think Tank The Delphi Group**  
The COVID-19 crisis has made abundantly clear that the current health care ecosystem is ill-prepared to deal with the health care needs of the 21st Century. With an aging global demographic with more than half of the world’s population in the 60+ age group by 2060, the world’s real health care crisis has barely begun. The challenge isn’t advances in medicine, the threat of future pandemics, or our ability to develop new pharmaceuticals and therapies, but rather a health care ecosystem that pits payor against provider, forces gaming of the system, poorly orchestrated supply chains, and the enormous burden on providers to handle so many of the administrative aspects of health care. The best hope for health care is to rethink how to refocus every part of the health care ecosystem on what it does best.
